

Greetings from the Top

During our 91st fiscal year from April 1, 2008, to March 30, 2009, the Japanese economy declined at a rapid rate, driven by the global slowdown triggered by the financial crisis in the US at the start of the second half of the period.

In our own industry, even private-sector capital investment that had remained comparatively firm was affected by the worldwide economic crisis. Corporate profits fell drastically, in the export industry especially, with the industry becoming sluggish as capital-investment plans were suspended or postponed. Furthermore, spending for public-work projects remained low, reflecting the state of finances on both the national and municipal level, while booking and price competition grew fierce, making for a severe business climate.

Amid these circumstances, the final year of our Medium-term Business Plan (running from April 2006 through the end of March 2009), we devoted ourselves especially to concentrating our management resources on our core business while working to increase efficiency, along with uniting the company in profit-oriented strategies.

Despite these efforts, orders received and net sales for the past year both declined, with orders received finishing at to JY 165.064 billion (down 8.8% YoY) and net sales at JY 168.540 billion (down 12.6% YoY).

With respect to profitability, this drop in sales impacted on our overall profits, and we finished the year with JY 5.865 billion (down 20.7% YoY) in operating profits and JY 4.268 billion (up 25.8% YoY) in net profit.

Economic trends for the coming year include not only the economic situation that has been in decline since the latter half of the last fiscal year, but also concern over the impact of the recent outbreak and ongoing spread of H1N1 influenza on economic activity. For both foreign and domestic demand, the outlook appears grim, and no one knows how much they may yet fall.

In our industry, continued shrinkage of the construction market due to eliminated or postponed private-sector investment and increasing sharpness of competition for bookings and in prices appear unavoidable, and may even worsen.

Given this situation, together with pressing ahead with the sustainable growth strategies that we have advanced for the past three years, we have formulated a new Medium-term Business Plan to gain a solid foothold and build a robust corporate constitution capable of generating profit in any business climate. Organized under the theme of "Transitioning to a Robust Corporate Constitution — Solidifying Our Strategies for Sustainable Growth," the new Medium-term Business Plan is grounded on the pillars of "Advancing order-booking strategies aimed at boosting revenues," "Improving business efficiency," "Strengthening business-management systems," "Strengthening and fostering of human resources." (For details, please see page 13 and page 14.)

We intend to bring all our efforts to bear and achieve solid results for each item of the new Medium-term Business Plan toward the goal of maximizing our corporate value. To this end, we look forward to your continued understanding and support.

July 2009

President
Hiroshi Ochi

Performance trends April 1, 2008 to March 31, 2009

Topics

New Medium-term Business Plan (FY2010 to FY2012)

"Transitioning to a Robust Corporate Constitution"

– Solidifying Our Strategies for Sustainable Growth –

Basic Strategies –

- Maintain a constant awareness of customer satisfaction, ensure thorough provision of finegrained services from the customer's standpoint, and become an enterprise trusted and chosen by customers.
- Reliably implement efforts aimed at improving the overall strengths of the Chubu Electric Power group as well as the TOENEC Group.
- Endow each individual member with a wide field of view taking in the entire company and implement overall optimization efforts to augment the overall strengths of the company.
- Strive to augment the on-site capabilities that provide the overall strength of proposals, sales, management, guidance, and other activities that drive company growth.
- Advance creation of dialog-oriented worksites that are vibrant and vigorous.

I. Medium-term Business Plan

A. Advancing order-booking strategies aimed at boosting revenues

- 1. Expanded bookings and expanded original-contractor construction for core-business operations
- a. Strengthen creation of long-term relationships with customers.
- b. Strengthen sales organizational capabilities and expand bookings in air-conditioning ductwork business sectors
- c. Expand bookings for mobile communications construction work.
- d. Proactively advance sales reforms.
- e. Strengthen cooperative sales with Chubu Electric Power that take advantage of our technical strengths.
- f. Strengthen systems for maintenance and renovation
- g. Proactively advance sales and construction for all-electrical equipment and solar power generation.

2. Development and expansion of novel and new-domain business

- a. Proactively advance alliances for expansion into new lines of business.
- b. Proactively expand bookings for peripheral operations for the power-distribution business sector of Chubu Electric Power.
- c. Expand bookings for energy-solution business
- d. Strengthen booking strategies in the area of environmental-impact solutions, including energy conservation (reduction of CO2 emissions) and other eco-business activities.
- e. Expand new value chains.

B. Improving business efficiency

1.Advancement of comprehensive cost-reduction measures

- a. Advance comprehensive price management and cost reductions to strengthen cost-competitiveness and secure profits.
- b. Boost the efficiency of construction-management operations and augment site-support operations.

- c. Promote further reductions in sales expenses as well as general administrative expenses and fixed expenses.
- d. Revise business operations, projects, and sales centers based on evaluations of growth potential and viability.
- e. Reduce costs by mitigating the environmental impact of business activities.

2. Redistribution of management resources

Redistribute personnel in business sectors, headquarters, and branches in order to respond flexibly according to the scale of construction operations and strengthen systems capable of generating profits.

3. Advance cash-flow management

- a. Promote efficient use of idle resources.
- b. Improve efficiency of fund operations through prompt and sure recovery of construction payments.

4. Implement IT strategies

Leverage IT to improve productivity through labor-saving measures for site management indirect operations.

5. Promotion of communication among business sectors, headquarters, and branches

Efforts to augment the company's total strengths and achieve overall optimization through further collaboration among business sectors, headquarters, and branches.

C. Strengthening business-management systems

- 1. Promotion of moves to become a trusted enterprise
- a. Work to establish solid compliance, environmental protection, information disclosure, and other aspects of corporate social responsibility (CSR).
- b. Accurately implement internal control systems to improve quality of operations and achieve social responsibility.
- c. Deploy improvement measures for the triad of safety, quality, and work efficiency.

2. Strengthened business-management systems for the corporate group

- a. Improve the overall strengths of the group through such measures as establishment of a group-wide value chain.
- b. Strengthen group business-management systems aimed at boosting revenues.

3. Strengthened risk management

- a. Respond rapidly to risks through close alliance with personnel in related areas.
- b. Achieve sure recovery of loans and prevent occurrence of nonperforming loans through credit-exposure management.
- c. Eradicate sources of negative costs.
- d. Take proactive initiatives for achieving a low-carbon society.

D. Strengthening fostering of human resources

- 1. Strengthened fostering of human resources
 - a. Sustain and pass on our own innovative proprietary technology and skills in a dependable manner.
- b. Systematically foster qualified personnel with actual work experience.
- c. Implement job rotation among younger workers and midlevel employees and fast-tracking to management positions for midlevel employees.
- d. strengthen fostering of human resource having strategic capabilities, a challenge-seeking attitude, and the ability to act.

2. Strengthened on-site capabilities

- a. Improve on-site technical capabilities through further augmentation and strengthening of technical training.
- b. Strengthen systems for training and work support for cooperating companies as our partners.
- 3. Creation of a more vital workplace
- a. Advance creation of a an open and energetic workplace.
- b. Evaluate and revise human-resources programs for boosting motivation.

I. Numerical Targets (Values for FY2012)

	Consolidated	Non-consolidated	
Bookings	Over JY190 billion	Over JY185 billion	
Revenues	Over JY190 billion	Over JY185 billion	
Operating income	Over JY5.0 billion	Over JY4.5 billion	
ROE	Over 3.2%

Awarded the Silver Medal in the Best ESCO Project Award

The Hamamatsu Photonics K.K. Central Laboratory ESCO Project in which TOENEC and Hamamatsu Photonics K.K. are participating was selected the 4th Best ESCO Project under the Best ESCO Project Award program sponsored by the Energy Conservation Center, Japan (ECCJ).

This award program targets ESCO projects in Japan that have a record of operation of at least one year after implementation while demonstrating excellence in energy conservation and business performance. The aims of the award program are to further promote and popularize excellent ESCO projects, and to contribute to the protection of the environment and energy conservation, including the prevention of global warming.

Hamamatsu City Hall Building ESCO Project

A group spearheaded by TOENEC is participating in the Hamamatsu City Hall Main Building ESCO project, which is under public tender by the city of Hamamatsu.

The proposal of the group put together by TOENEC and Mitsubishi UFJ Lease & Finance Company has earned high acclaim for its broad range of proposed energy-saving methods, balanced set of proposals, specific technical proposals, and feasibility.

Completion of the New Main Building for TOENEC's Gifu Branch

TOENEC's Gifu Branch Main Building has been completed. A solar photovoltaic power generation system is installed on the roof of the branch as an environmental consideration. This solar-power system is configured with a 16-kW bifacial solar cell module and a 15-kW monofacial module, for a total of 31 kW of power generation. The generated electricity is used to by the facility.

Winner of the Product Contest at the Electrical Construction Equipment and Materials Fair 2008

The DV wire grip, developed jointly by the Technical Group in the Distribution Administration within the Distribution Headquarters and Nagaki Seiki Co., Ltd., was awarded the Japan Electrical Construction Association Chairman Award in the Product Contest held concurrently with the Electrical Construction Equipment and Materials Fair (ECEMF) 2008 sponsored by the Japan Electrical Construction Association, which took place at Intex Osaka over a three-day period starting May 28, 2008.

The DV wire grip is a tool used in stringing operations for pulling-use polyvinyl-insulated electrical cable (DV) in power-line construction work. Subsequently, in response to requests from on-site users, it was modified for additional use as a cable clamp (pole-top retainer) for temporary power transmission, and it was renamed the "belt wire grip."

Topics

Selection As a Designated Manager

Okazaki City Civic Center (Okazaki, Aichi Prefecture)

We have been selected as a designated manager with the role of facility maintenance and inspection for the Okazaki City Civic Center. For companies were selected as designated managers. Besides TOENEC, these are Suntory Publicity Service Ltd., a leading enterprise engaged in consulting, Nagoya Building Service Co., Ltd., which conducts operations that include facility operation, maintenance, and custodial services, and P&P Co., Ltd., which is involved in stage equipment. The companies were selected as "enterprises able to bring creative measures to management and operation."

Komaki City Nambu Community Center and Komaki Minami Children's Center

Shogakukan-Shueisha Productions Co., Ltd. and TOENEC have been selected as the designated managers for the Komaki City Nambu Community Center and Komaki Minami Children's Center (nicknamed "Furatto Minami"). The TOENEC Group earned high marks in the six evaluation areas of task competence, basic concepts of maintenance and operation, accounting plan, facility management and business management plan, maintenance management plan, and state of facility management and operation.

Recent Construction Projects

Aizu Olympus Plant (Aizuwakamatsu, Fukushima Prefecture)

In the project to rebuild the existing Aizu Olympus plant, TOENEC was charged with electrical-equipment construction and renovation of the wastewater treatment facilities. The electrical-equipment construction involved the Tohoku region's first-ever installation of ultra-high-efficiency transformers. In the renovation of the wastewater treatment facilities, YLEX-ITE Ash, which demonstrates high effectiveness in lead treatment, was adopted as the flocculant.

Olympus Research and Development Center Hachioji (Hachioji, Tokyo)

We undertook main trunk-wiring facility construction at the Olympus Research and Development Center Hachioji.

Solar Photovoltaic Power-generation Facility at the Nihon Pisco Ina 2nd Plant (Kamiina-gun, Nagano Prefecture)

We undertook construction of a solar photovoltaic power-generation facility at the Ina 2nd Plant of pneumatic-equipment manufacturer Nihon Pisco Co., Ltd. This project involved installing a total of 2,224 photovoltaic panels on the plant's south-facing outer walls. The installation covers some 3,000 square meters and can generate a maximum of 400 kW, making it the largest-class facility of its kind in Nagano Prefecture in terms of both area and output.

Company Overview

Trade Name TOENEC CORPORATION
Head Office 20-31 Sakae 1-chome, Naka-ku

Nagoya 460-0008, JAPAN

Established October 1, 1944

Capitalization JY7,680,785,924 (as of March 31, 2009)

Employees 4,852 (as of March 31, 2009)

Business Lines

- 1. Electrical and communications construction
- 2. Pipe-laying
- 3. Fire-control system construction
- 4. Construction and building works
- 5. Scaffolding, earthworks, and concrete works
- 6. Road surfacing
- 7. Painting
- 8. Waterproofing work
- 9. Waterworks
- 10. Steel-structure construction
- 11. Machinery and tool installation
- 12. Interior finishing work
- 13. Cleaning-facility construction
- 14. Hot and cold water systems, and other work related to power provision, including steam and thermal generation, and wind and solar power generation
- 15. Electrical transmission construction
- 16. For all the items above, surveying, design, supervision, maintenance, and consultation services, along with associated commissioned research, planning, development, etc.
- 17. Procurement, manufacture, sale, and leasing of the goods listed below
 - A. For the items listed above, power cables, utility poles, power stringing tools, etc.
 - B. Control equipment for power generation and transmission, lighting equipment, and wiring materials
 - C. Electrical appliances, furniture, kitchen equipment, medical equipment, health and hygiene equipment, home-care devices, home-care goods, fitness equipment, sporting goods, apparel, and sundry items
 - D. Building plant and equipment, air-conditioning equipment, and compressors
 - E. Power-transmission equipment, computer systems, data terminals, and parts related to these
- 18. Ordinary freight vehicles
- 19. Sale, leasing, and management of real estate
- 20. Investment and financing in other companies
- 21. Manpower dispatching
- 22. Any business related to any of the items above
